TECH STACK

- R · tidyverse · ggplot2 · Quarto
- Python · pandas · numpy
- matplotlib · seaborn · plotly
- scikit-learn · XGBoost · statsmodels
- SQL · R Markdown · Jupyter
- Claude API · Generative AI
- AI-powered automation

ML & STATISTICS

- Supervised learning
- Unsupervised learning
- Classification & regression (GLM)
- Outlier detection (LOF)
- EDA · Statistical inference
- Survey data analysis (RB050)
- Time series (foundational)

LANGUAGES

- Spanish — Native
- English — B2 Upper Intermediate

MATHEMATICS

- Linear Algebra
- Discrete Mathematics
- Inferential Statistics

Lorena Marcos

Data Scientist · Applied Data Science · UCM

Madrid · Available for junior data science roles

PROFILE

Applied Data Science student at Universidad Complutense de Madrid with an active, growing GitHub portfolio. I work with R and Python on real-world datasets — from official national survey microdata to predictive models on 150k+ records — publishing every analysis as a fully reproducible report. I am passionate about applied AI: I use tools like Claude and the Anthropic API to automate analytical workflows and explore new methodologies. I am looking for a junior role where I can keep developing and contribute value from day one.

PROJECTS

Cancellation Prediction Model — Ride-Sharing (NCR)

Machine Learning · XGBoost · Classification 2025

- XGBoost classification model to predict trip cancellations on ~150k ride-sharing records.
- Feature engineering on temporal, geographic and user-behaviour variables.
- Full pipeline: EDA, data cleaning (structural MNAR, duplicate IDs), training and evaluation.

R **XGBoost** **tidyverse** **Quarto** **~150k records**

Rental Market & Income Inequality in Spain

Statistics · Official INE Microdata · ECV 2024 2025

- Analysis of living conditions for tenants vs. landlords using survey-weighted microdata (RB050).
- Comparison of mean equivalent income, P10/P50/P90 percentiles and P90/P10 inequality ratio.
- Reproducible report published on GitHub Pages: lorenadata.github.io/ECV-rental-market

R **dplyr** **ggplot2** **Hmisc** **INE ECV 2024**

Child Poverty in Spain

Statistical Inference · Official INE Microdata · ECV 2024 2025

- Analysis using official INE microdata with complex survey weighting (RB050).
- Fully reproducible pipeline published as an interactive HTML report on GitHub Pages.

R **Quarto** **INE ECV 2024**

Fiscalis Database — Tax Management for Self-Employed

SQL · Relational Database Design 2025

- Design and implementation of a relational database for a SaaS fiscal platform: invoices, clients, fees.
- SQL scripts with treasury analysis queries, tax obligations and payment calendar.

SQL **PostgreSQL** **Relational Design**

EDUCATION

BSc in Applied Data Science

Universidad Complutense de Madrid (UCM) 2023 – present

- Relevant coursework: Machine Learning, Supervised & Unsupervised Learning, Time Series, Statistics, Data Mining, R, Python, SQL, Linear Algebra.

EXPERIENCE

Solar Energy Hackathon — Predictive Pricing Model

Competition · Team work · < 48 hours 2024

- Built a predictive model for photovoltaic energy prices in under 48 hours as part of a team.
- Market analysis and feature engineering under time pressure with a multidisciplinary team.
- Presented findings to a technical evaluation panel.

Predictive Modeling **Feature Engineering** **Python** **Teamwork**
